DESMOND W. CLAY

(315) 338-4480 | | D.W.Clay94@gmail.com

Profile: A Blend of Applied Skill & Professional Resilience

A **highly capable and versatile professional** distinguished by a powerful combination of self-driven technical expertise and extensive, diverse real-world experience. I possess a **natural talent for rapidly mastering new domains**, **engaging with diverse people**, and **applying analytical and innovative problem-solving** to deliver robust solutions. My background includes hands-on experience in full-stack development, AI/ML, hardware integration, and 3D prototyping, complemented by a proven history of **exceptional adaptability, unwavering reliability, strong work ethic, and effective communication** in varied professional environments. I consistently demonstrate **ownership, discretion, and a results-oriented mindset**, whether driving complex technical projects or managing diverse operational responsibilities. I am a self-driven individual, adept at independent research, interpersonal relations, and quickly translating new knowledge into tangible results.

Core Strengths: Capabilities & Attributes

Problem Solving & Rapid Learning: Analytical & Innovative Problem Solver, Rapid Learner & Adaptor, Independent Researcher (Documentation, Source Code), Critical Thinker, Resourceful, Adept at Overcoming Technical Challenges, Proven Ability to Quickly Grasp Complex Systems.

Technical Expertise: Python (Advanced), JavaScript, HTML, CSS, Lua, G-code, Full-Stack Development, AI/ML Concepts (NLP, Computer Vision, Generative Models), API Development, Cloud Platforms (GCP), Hardware Interfacing (Raspberry Pi, IoT), 3D Printing/Design, Rapid Prototyping.

Professional Acumen: Adaptability, Reliability, Discretion, Strong Work Ethic, Effective Communication, Time Management, Self-Management, Client Satisfaction Focus, Team Collaboration, Professional Resilience, Leadership, Customer Relations, Operational Management, Process Improvement.

Experience: Applied Skill & Professional Impact

Founder - D-Net Lab | Technologist / Solution Architect

2020 - Current

- Established and operated an independent technology solutions and 3D printing manufacturing business, demonstrating **entrepreneurial drive, full project ownership, and end-to-end management**.
- Architected and developed custom software, AI-driven applications, and hardware solutions, including establishing an online presence with websites featuring innovative functionalities.
- Provided clients with precision-designed and manufactured parts and products, consistently delivering sub-millimeter accuracy and **demonstrating a commitment to quality and client satisfaction**.
- Managed all business operations, including strategic marketing, sales (online and in-person), and client relations, showcasing **versatility and responsibility** across diverse business functions and **structured operational management**.
- **Independently acquired and applied a diverse skill set**, highlighting a **self-motivated approach to continual learning and growth**.

Sales Supervisor | Harbor Freight

2017 - 2019

- Built and led a dynamic sales team in a new retail store environment, demonstrating **leadership and team-building skills**.
- Managed daily operations, including overseeing multiple cash registers and ensuring smooth workflow, showcasing **operational efficiency and responsibility**.
- Excelling in customer relations, skillfully managing disputes, refunds, and exchanges while providing expert product knowledge, highlighting **strong communication and problem-solving in a customer-facing environment**.
- Played a pivotal role in ensuring the store's successful launch, demonstrating **initiative and results-orientation**.

Instacart & DoorDash | Delivery Driver

2021 - Current

- Consistently demonstrated **reliability, strong time management, and efficient problem resolution** in dynamic, independent, customer-facing roles.
- Honed **self-management skills** and the **ability to work effectively without direct supervision**, consistently achieving results through **goal-orientation and process adherence**.

Full-Stack Developer | Janitorial Company

2019 - 2020

- Held a unique dual role, leveraging downtime to craft and maintain websites, orchestrate mass email campaigns, and develop custom tools and pipelines, showcasing **adaptability and resourceful technical application** within a non-traditional setting.
- Demonstrated the ability to identify needs and create tailored digital solutions to address various business challenges, highlighting **practical problem-solving and efficiency improvements**.

Activities Team Lead | Betsy Ross Nursing Home

2021 - 2022

- Led the Activities Team, designing and organizing engaging activities that promoted social engagement and mental stimulation for residents, demonstrating **leadership, planning, and interpersonal skills**.
- Formed deep bonds with residents and families, enriching their lives through meaningful interactions, highlighting **empathy, communication, and a commitment to well-being**.

Additional Professional Contributions

- Experience in roles demonstrating consistent **adaptability, strong interpersonal skills, responsibility, and a reliable work ethic**, including **customer service**, **physical labor**, **volunteer work**, and **caregiving**.
(more details available upon request)

Applied Solutions: Technical Projects | Skill in Action

D-Net Platform (Web | API | AI)

- Architected and developed a modular, full-stack web platform using **Python (Flask), Jinja, JavaScript, and SQLAlchemy** to deliver accessible AI and API services. **Demonstrated end-to-end development, user-centric design, and successful integration of complex systems (Stripe API, Generative Models)**. **Successfully overcame significant technical hurdles** through **persistent, independent problem-solving and structured technical approach**.

Tactical AI (Real-time Gaming)

- Developed a real-time AI system using **Python and OpenCV** for tactical guidance. **Applied Computer Vision in a performance-sensitive environment, demonstrated rapid adaptation to a specific domain, and implemented creative solutions**. **Successfully addressed real-time processing challenges**, highlighting **performance optimization and attention to detail**.

Raspberry Pi Automation System

- Designed and built a custom automation device utilizing a **Raspberry Pi** configured as a Human Input Device (HID). **Showcased innovative hardware-software integration, low-level system understanding, and successful problem-solving** through **independent technical research and systematic implementation**.

High-Accuracy Eye Tracking Software

- Developed eye pupil tracking software using **OpenCV Python**. **Demonstrated practical Computer Vision skills, analytical problem-solving in algorithm refinement, and forward-thinking application of technology**. **Focused on achieving high accuracy**, highlighting **attention to detail and iterative improvement**.

Education

Mohawk Valley Community College | International Studies

Rome Free Academy | High School Diploma

BOCES | IT-Systems (Networking Focus)

I am ready to apply my unique blend of technical talent, problem-solving drive, and professional resilience to contribute meaningfully to your team.
